## ILLINOIS CREEK MINE - ROUND TOP CU MO PROJECT - HONKER GOLD PROJECT

March 27, 2020

Email letter Alaska Department of Natural Resources/Mining Section 3700 Airport Way Fairbanks, Alaska 99709

Attn: Mr. David Charron

Mr. Charron,

Please accept this application for Amendment #1 to APMA/MLUP #9831. Western Alaska Copper and Gold (WACG) is submitting this APMA/MLUP amendment to reflect development of a landfill on State lands where WACG holds valid state mining claims and is engaged in mineral exploration in and around the past-producing Illinois Creek Mine. WACG has already applied for a landfill permit from ADEC under 18 AAC 60.200(d) and anticipates having that permit approval by June 2020. Having the landfill included in the APMA/MLUP also serves to satisfy ADEC's requirement for landowner approval as part of their permit approval process.

We have included the attached plan map that shows the approximate location and dimensions of the landfill. The ADEC landfill permit limits the landfill to a volume of 1,000 cubic yards of inert waste. WACG intends to place inert waste consisting of steel and other demolition waste from the historic Illinois Creek Mine camp and this activity is part of WACG's ongoing effort to continue cleaning up this site as inert waste is generated from degenerating buildings.

Time is of the essence in that we require this amendment approval in order to allow ADEC to issue the landfill permit, all in time for us to develop the landfill during the 2020 summer season. If you have any questions regarding this APMA/MLUP amendment, please contact Mr. Jack DiMarchi at 206-790-0227 or by email at <a href="mailto:jack.dimarchi@coregeoscience.com">jack.dimarchi@coregeoscience.com</a>.
